

NEW!

Unique moments.

The rain has stopped. Droplets glitter like diamonds on the tips of the emerald-green leaves. Extreme humidity and temperatures up to 86° Fahrenheit make your trek through Ecuador's cloud forest particularly strenuous. Still, the fascinating flora and fauna of the Mindo-Nambillo Protected Forest offer rewards with every step. In a small clearing in the middle of the forest, you suddenly spot the iridescent colors of a hummingbird hovering in place. In moments like these, passionate birders appreciate the importance of reliable, rugged equipment to insure they see every minute detail of this dazzling bird as it flits backwards and sideways from flower to flower.

With the new Trinovid 42 binoculars, you're visually just a wing-beat away from the action. Ever since 1958, when they were first launched, Trinovid binoculars have boasted three key attributes: compact ergonomic design, an easy-to-use inner focus mechanism, and outstanding optical performance. With great attention to detail, technical expertise, and a commitment to constant improvement, our Leica Sport Optics specialists have brought this line to a new level of excellence.

Today we are pleased to present the best Trinovid of all time. You can depend on it to meet all challenges. And you'll be rewarded with unforgettable views.

Technical data.

Binoculars	Leica Trinovid 8 x 42	Leica Trinovid 10 x 42
Order no.	40 008	40 009
Package includes	contoured neoprene carrying strap, front lens caps, eyepiece caps, Cordura case	contoured neoprene carrying strap, front lens caps, eyepiece caps, Cordura case
Magnification	8 x	10 x
Front lens diameter	42 mm	42 mm
Exit pupil	5.3 mm	4.2 mm

Trinovid 42.

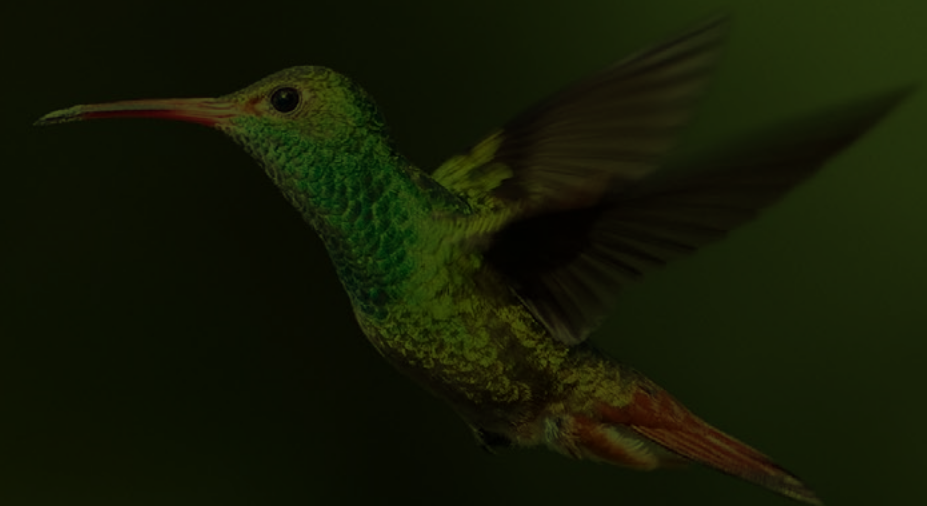

Rugged and reliable.

TRINOVID 42

Don't just see it, feel it.
Every moment.

The new Trinovid 42 represents the latest generation of a classic – one which has proven itself for over half a century. More than a mere reproduction, these new binoculars are the result of our dedication to improving technology and investing in better materials. The outcome: two new Trinovid models that are better than ever.

Virtually indestructible

Even their appearance shows strength of character. The nitrogen-filled magnesium body makes them so robust that they can withstand the harshest treatment. You'll enjoy absolute peace of mind, in even the worst weather – both Trinovid 42 models are waterproof to 16.4 ft / 5 m and the internal lenses will not fog up. Thanks to their ergonomic design, they sit comfortably in your hands, even on long, challenging field trips. The high-traction rubber armoring provides a secure, non-slip hold.

Uncompromising performance

Both Trinovid 42 models offer superb optical performance and mechanical properties. The patented multifunction center drive provides optimum operator comfort for focusing and diopter adjustment, while the HDC® multicoating delivers brilliant light transmission plus exceptional scratch resistance. The exceptional depth of field allows effortless scanning of the terrain before you, with no need to refocus.

LEICA TRINOVID 8 x 42

- perfect all-round binoculars
- fatigue-free viewing well into dusk
- absolutely steady image for comfortable viewing
- large depth of field provided by 8 x magnification

LEICA TRINOVID 10 x 42

- ideal for viewing at extreme distances
- brilliant panoramic views and detailed close-range observation
- excellent low-light performance combined with compact size
